10/2019 to 07/2020, Skopje

**Bachelor of Economics - Faculty of Economics, St. Cyril and Methodius University –** Skopje  
- Financial Management

## Experience

**LDK (Livedooh Signkick), Skopje office**  
August 2021 -

### Platform Solutions Engineer –

- Worked on developing, testing and implementing a custom solution using the existing html5-based web-container app to connect cloud ad-server with third party CMS, incorporating their SDK to ensure smooth playing of programmatic advertisements.
- Created reusable library implemented in the web-container app that ensures every advertisement playback is reported to the third party audience recognition engine and analytics API.
- Created cache-SDK, a library that is used for caching programmatic and dynamic creatives media files, resulting in lowering CPU usage and bandwidth, by using media files (images, videos) and JSON-data from cache storage, instead of downloading it from the network.

- Written documentation on programmatic integrations, requirements for dynamic creatives, implementation of the cache-SDK.
- Debugging, improving existing and develop new programmatic integration template apps.
- Created Kibana Dashboard of charts for monitoring the performance of the programmatic integrations using logs messages as performance indicators.
- Contributing on developing SSP (supply-side-platform) for real-time programmatic transactions, providing media owners with complete platform with tools and controls that facilitate the management of open-real-time-bidding deals and monitor deals, revenue performance, bid activity by DSP and advertiser.
- Work on developing documentation website.
